Who?

Created in 2017, Monuma is a company qualified in the expertise of luxury and collectibles, works of art, real estate, stored or transported goods... for insurance purposes for the Art, Auto, Industry, Transport, Building and Banking/Insurance sectors.

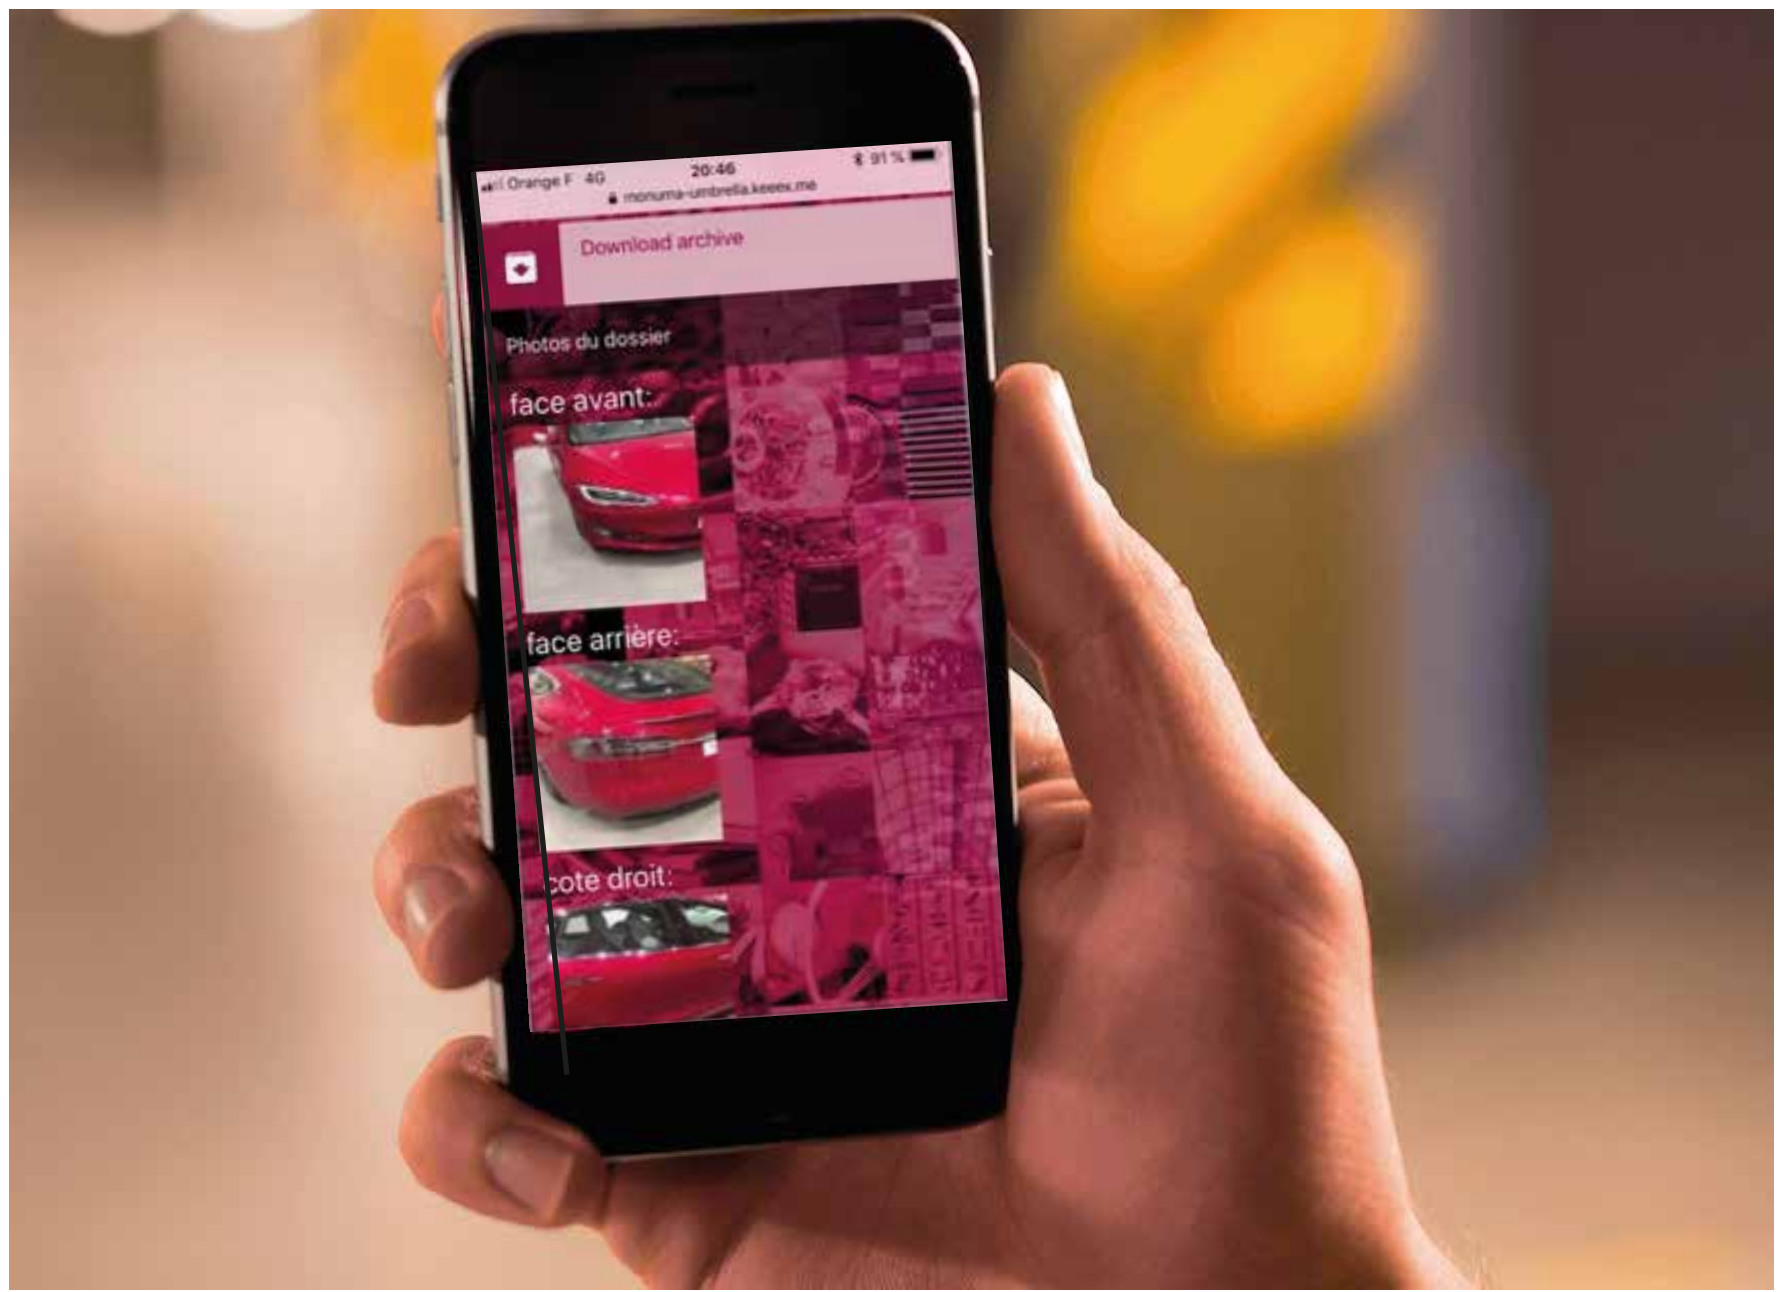

Monuma offers, through several mobile applications for individuals and professionals, a service of expertise and digital valuation.

Monuma undertakes to respond to a request within 48 hours.

Problem starting?

The Monuma company approached us with a simple problem:

How to accelerate and secure the expertise and insurance processes?

Solution ?

Keeex has therefore developed for Monuma mobile applications integrating its Keeex fusion and Keeex PhotoProof technology. These applications allow the user, whether professional or private, to take several photos of a property to be appraised.

These photos, with guaranteed and verifiable proof of integrity, identity, date, location and blockchain anchor, are received by Monuma, which can then proceed with a remote appraisal.

Once this has been completed, a certificate of expertise, itself certified, is returned to the user.

Keeex has given Monuma the possibility to create a pocket expert, any-time and anywhere.

Value proposition?

Thanks to our technology, Monuma saves time and money for individuals or legal entities who own a good to be appraised,

In addition, it provides a faster service for insurance procedures, whether it is a subscription to an insurance policy or a claim.
